

# SUSTAINABLE STORAGE AT MCGILL'S COLLEGE AVENUE LIBRARY

## LEED Certified Facility

Energy efficient building, green exterior grounds, electric car charging stations, choosing the right building materials and more.

## High Density Storage

High density storage that reduces the footprint of the facility by up to 25%.

## Energy Efficient Robots

Running 6 robots for a 24 hour shift uses less energy than running a vacuum for 60 minutes.

## Sustainable Forklifts

Moving materials was a key to meeting our sustainability goals, including a maximum in fuel efficiency and a minimum waste of space.

## Efficient Delivery

Digital materials will be offered to users. Delivery vans for physical materials will be electric.
